

## „ShLOW”, report II

- 1) Making movies. I prepared movies which drivers will watch. I used pictures from tragic accidents in Poland. I think that, when people will watch pictures from accidents in their country, this will be closer to their hearts and it will make that they will be better, slower drivers.
- 2) Testing devices about playing movies in Police cars in my school (The High School of Police in Szczytno). Firstly, we checked if police car`s devices will be good to present movies.
- 3) Making opinion pool and presenting movies to people in my school. Collecting opinions about it. Next, thanks for opinion people`s, I made some corrects in movies.
- 4) Resignation form idea about what I wrote in report I: giving to drivers CD`s with movies, because it is too hard to make through copyrighting- we could not spread pictures and movies another authors on CD`s.
- 5) Contact with local radio station. Now, they know about my idea, but they are waiting for moment when it will be initiate in life.
- 6) Effects: this idea is this same how I wrote in report I: Firstly the police will be measure speeding of driving. Next will be control and presented movies. After the control, 4-5 km I will be measure speeding drivers who was watching the movies. I will be compare firstly speeding and speeding after watching the movies. From this way I will see if watching movies has influence for driving.
