

## **Annex No.1 – Proposal of calming on area**

### **1) Issue of right hand rule**

The drivers don't absolutely respect right hand rule on whole residential area.  
The low-cost solution is a painting of STOP lines on every crossroad (see below).

## 2) Issue of change of speed from 50kph to 30kph – entry gate

The drivers don't know about the change of regime. They don't introduced with speed limit 30 kph. The proposal builds new entry gate to the area. I have suggested 2 choices of gate. Proposal gate is moved closer to the residential area (about 20 meters), the zebra is re-newed, moved over 4 metres. The colour of surface is painted to red, there is a horizontal sign "30 speed limit" on surface. There can be a psychological brake (road markings) before the zebra. The low-cost solution can be a plant pots on both side of road, which optically narrow the road. But it is not possible combine with the pedestrian walk. The banner between the lampposts are very effective, it's easy recognizable. The layout of situation of every proposal is added in PDF format in separate files.

Proposal No.1

Proposal No.2

### 3) Issue of speed near the basic school

The children cross the road to yellow bus stop. The speed of cars are inappropriate. The solution is building of speed cushion. Speed cushion provides comfortable drive for public transport.
